

REDEFINING THE COURSE OF ENERGY IN THE FACE OF CLIMATE CHAGE

6 th INTERNATIONAL ENERGY CONFERENCE 2025

THIRD CALL

The Mexican Academy of Energy, AC, and the Mexican Academy of Engineering are pleased to invite you to participate in the 6th International Energy Conference, which will take place from **September 24 to 26, 2025, at the Palacio de Minería, Tacuba # 5, Historic Center, Mexico City.**

The International Energy 2025 Conference aims to discuss advances and propose new collaborative projects on basic and applied research, technological development, education, and energy sector policy.

The topics that the Congress will cover are:

Biofuels
Education
Efficiency
Power energy
Geothermal
Windpower

Hydrogen
Maritime Energy
Energy Policy
Solar
Sustainability
Nuclear Energy

The Congress will bring together academic, industrial, and political figures from the public and private energy sectors to create a space for disseminating knowledge, but essentially for the cooperation and connection of all these sectors. This connection aims to generate large-scale projects that impact the energy sector.

Abstracts will be received through the Mexican Academy of Energy: www.amexen.org

Dead line for submitting abstracts: May, 12
